Ladies Learning Code Sponsorship & Partnership Opportunities

Who We Are

We are a not-for-profit organization with the mission to be the leading resource for women and youth to become passionate builders - not just consumers - of technology by learning technical skills in a hands-on, social, and collaborative way. Since 2011, we've taught over 23,000 Canadian women and youth to code. And, we're just getting started.

Check out our Annual Impact Report [here](#).

What Makes Us Different?

1) Our Learning Environment

The key to our success has been our unique social and collaborative approach to technical learning that has a 4-1 ratio of learners to volunteer mentors. Ladies Learning Code is known as a safe, welcoming environment where beginners of all backgrounds feel comfortable learning.

2) The Cross-Canada National Approach

We're the only organization providing technical workshops for women and youth in 22+ cities across Canada (and growing!) As we expand nationwide, we work with local leaders to create solution that address the unique needs of their communities. Being a grassroots, community-driven organization is what has made all the difference.

3) Our Community

Women, men, beginners, experts, youth and everyone in between. All are equally important -- and present -- at Ladies Learning Code. Whether you're interested in engaging seasoned developers, women who are building their first website, or some of Canada's brightest young minds, all are present in our community.

4) We Founded Canada's National Learn to Code Days

We founded [National Learn to Code Day](#) and [Girls Learning Code Day](#) as cross-Canada initiatives to make digital literacy a household name. And it's working! Each year, we have over 1,200 women and girls participate in simultaneous one-day workshops across the country.

What Does Ladies Learning Code Look For in a Partnership?

We're big fans of win-win relationships. We know that collaboration with organizations that share our vision are essential to the success of our mission, and we are looking for sustainable, mutually-beneficial partnerships for the long-term.

Let's chat.

Hubba - Ben Zifkin, Founder & CEO

Sponsoring Ladies Learning Code is one of the best investments our company has made. It allows us to get involved in a cause - promoting digital literacy - that supports our company values while allowing us to integrate ourselves in the fabric of the startup community in Toronto, fostering many new business relationships for our growing company.

Nascent Digital - Shawn Konopinsky, Co-Founder & CEO

Our relationship with Ladies Learning Code has allowed us to tap into a network of strong developers and designers, making key additions to our organization that allow us to take on valuable client projects that propel our business forward.
